Professional Summary

Versatile, technology-driven professional with strong computational foundations and hands-on experience across software engineering, data analytics, and IT operations. Proficient in Java, Python, JavaScript, React.js, Node.js, Spring Boot, and database systems (SQL, MySQL, MongoDB). Advanced proficiency in Microsoft Office tools (Excel, Word, PowerPoint) for data querying, analysis, and executive technical documentation. Driven by deep curiosity for emerging software and computing systems, with a demonstrated ability to rapidly master new technologies, troubleshoot complex architectures, and deliver clean, scalable business solutions.

Education

Techno India University – Kolkata, India
Master of Computer Applications (MCA), Computer Science – **CGPA: 7.9** (Sep 2024 – Jul 2026)
Techno India Institute of Technology – Kolkata, India
Bachelor of Computer Applications (BCA), Computer Applications – **CGPA: 7.73** (Sep 2021 – Jun 2024)

Technical Skills

Programming Languages: Java, Python, JavaScript (ES6+), SQL, HTML5, CSS3

Frontend & UI: React.js, Responsive Web Design, State Management, Bootstrap, Flutterflow

Backend & APIs: Node.js, Express.js, Spring Boot, RESTful APIs, JWT Authentication, Microservices

Databases & Cloud: MySQL, MongoDB, Firebase Firestore, NoSQL Modeling, Google Cloud Platform

Productivity & Office Tools: Microsoft Excel (VLOOKUP, Pivot Tables, Formulas, Data Filtering), Word, PowerPoint

Data Analytics & Methods: Data Cleaning, Structured Querying (SQL), Trend Analysis, Process Optimization

Core Competencies: Data Structures & Algorithms, Object-Oriented Programming (OOP), SDLC, Debugging, Git

Technical Projects

E-Commerce Web Platform (2024)
Technologies: React.js, Spring Boot, MySQL, RESTful APIs, Git, Hibernate

- Designed and deployed an end-to-end e-commerce application with responsive navigation, dynamic product search, and checkout.
- Developed secure RESTful endpoints in Spring Boot with Hibernate ORM, ensuring high-reliability CRUD data transactions.
- Structured and indexed MySQL database tables to optimize search queries, decreasing query latency by 25%.
- Handled state management and implemented secure token-based session authentication for protected customer workflows.

Smart Parking Assistant App (2025)
Technologies: Flutterflow, Firebase Firestore, NoSQL, Google Cloud

- Built an interactive mobile prototype to streamline parking slot allocation and reduce booking friction for users.
- Integrated Firebase Cloud Firestore to support real-time data synchronization between slot updates and mobile clients.
- Designed intuitive UI flows and stateful components, validating functional flows through simulated user benchmarks.

The Mainframe (Full-Stack Blog Engine) (2026)
Technologies: Node.js, Express.js, MongoDB, JWT, bcryptjs, EJS

- Engineered a full-stack content publishing platform with secure CRUD operations and responsive front-end views.
- Built an Admin Override Panel with Role-Based Access Control (RBAC) to moderate content and monitor user activity.
- Enforced cryptographic authentication using JSON Web Tokens (JWT) and salted bcrypt hashing for protected endpoints.
- Optimized MongoDB NoSQL schemas to structure comments, post metadata, and author profiles efficiently.

Certifications

- **Google AI/ML Virtual Internship** – Google Cloud Skills Boost (Apr 2025)
- **Google Cloud Computing Foundations** – Google Cloud Skills Boost (Jun 2025)
- **Google Cloud Cybersecurity Certificate** – Network Security & Access Management
- **AngularJS Certification** – Single Page Application Architecture
- **Introduction to Cybersecurity** – Threat Analysis & Enterprise Best Practices
